Press Release

Cincinnati, OH
December 1, 2014

Super Systems Inc. (SSi) is excited to announce the acquisition of the Selas FLO-SCOPE® product line. Effective immediately, SSi will support and deliver the manual FLO-SCOPE® with an electronic version of a gas flow meter soon to follow.

“Customer service and innovation are the pillars of our organization,” explains Stephen Thompson, president of SSi. “This line of manual and electronic gas flow meters presents an excellent opportunity for us to expand our portfolio of quality products to the thermal processing industry.

“With our state-of-the-art manufacturing facility and our staff of engineers, we are excited about our ability to bring focus to this product line and provide the same level of service that we have always maintained with all of our products.”

The gas flow meters will be available in various sizes covering all combustion and process gases commonly used in the thermal processing industry. Selas will remain a strategic partner with SSi for providing the FLO-SCOPE® to their customer base on relevant applications.

About SSi

Super Systems Inc., based in Cincinnati, Ohio, has been developing and manufacturing products for the thermal processing industry since 1995. SSi's products include probes, analyzers, controllers, software solutions and engineered systems, and now flow meters. With over 100 years of combined experience, SSi continues to satisfy industry demands with innovative technology, enabling customers to be more efficient and to produce higher quality products. For more information on SSi's capabilities, visit www.supersystems.com.

About Selas

Selas Heat Technology Company has been dedicated to providing quality heat technology solutions since 1896. Selas has served the advanced thermal processing needs of tens of thousands of customers, providing mixers, blowers, balanced zero-ratio regulators, valves, air heaters, flame safeguard devices, package burners, nozzle-mix burners, self-recuperative burners, radiant flame shape burners, ultra-low NOx burners, combustion gas mixers, gas blender valves, flame arrestors and blowouts, BTU monitors and controls, flow meters, and much more. Selas delivers heat technology solutions to the glass, fiberglass, steel, ferrous and non-ferrous metals, chemical, petrochemical, automotive, plastics, ceramics, food processing, heat treating, powder coating, textiles and commercial/industrial boiler industries, all with the highest manufacturing quality, customer service and aftermarket support.

Selas brands include Pyronics, Maxsys Fuel Systems, Ray Burner, Ensign Ribbon Burner (ERB), Red-Ray Infrared burners, and Webster Combustion.
