Super Systems Hosts Open House October 9th, Celebrates 20th Year in Business

In July, Super Systems Inc. celebrated its 20th year in business. To celebrate this milestone, we are hosting an Open House on Friday, October 9th, from 11 a.m. to 3 p.m. EST. All of our customers and suppliers are invited to see our new manufacturing facility and greet the SSi team while enjoying some lunch and beverages. Door prizes will be featured. As part of the festivities, we will honor Bill and Doreen Thompson for their accomplishments since Mr. Thompson founded SSi 20 years ago.

SSi President Steve Thompson explains the importance of the new facility and the purpose of the Open House. "This Open House gives us the opportunity to say thank you to our employees, suppliers, and customers for helping us to make this company what it is today. In May, we moved production to a new building near our original facility. Now we're excited to showcase our state-of-the-art manufacturing facility, which enhances our ability to produce quality products for the thermal processing industry. We have built our business on the fundamentals of innovative products and customer support. This expansion allows us to continue to do this for years to come. Please join us October 9th to see our facilities and learn what's new at SSi."

Please RSVP to Rachel Davidson at rdavidson@supersystems.com or 513 701 2127.

Super Systems Inc., based in Cincinnati, Ohio, has been developing and manufacturing products for the thermal processing industry since 1995. SSi's products include probes, analyzers, flow meters, controllers, software solutions and engineered systems. With over 100 years of combined experience, SSi continues to satisfy industry demands with innovative technology, enabling customers to be more efficient and to produce higher quality products.
