## Super Systems Inc. Releases SuperCALC App for iOS and Android smartphones and tablets

Super Systems Inc. has released SuperCALC, an advanced calculator app for the heat treating industry available on smartphones and tablets running iOS (iPhone, iPad, and iPod) and Android operating systems. Apps for both platforms are available for free: the iOS version can be found in the iTunes App Store, the Android version in the Google Play store.

SuperCALC includes:

- The Furnace Calculator, which calculates %Carbon, Dew Point, and %Oxygen based on millivolts and temperature;
- The IR 3-gas Calculator, which calculates %Carbon using the furnace temperature and the CO, CO<sub>2</sub>, and CH<sub>4</sub> readings from a 3-gas analyzer; and
- The Generator Calculator, which calculates the required air flow and gas flow based on the capacity of the endothermic generator.

To get the app, you can:

1. Use your device to scan one of the QR codes in the sidebar on the right;
2. Open the appropriate link for your device below:
  - a. iOS: <https://itunes.apple.com/app/supercalc/id566387194?mt=8>
  - b. Android:  
<https://play.google.com/store/apps/details?id=com.supersystems.mobilesupercalc>  
or
3. Search for "SuperCALC" in your device's app store and install the app created by Super Systems, Inc.

Jim Oakes, Vice President of Business Development, says: "Our customers are using technology such as smartphones and Internet-capable tablets more and more in their day-to-day work. It's our job to continue providing them with the solutions they need to make their jobs easier. SuperCALC has been used on the Super Systems website for years, and it just made sense to make it even more accessible on the widely used smart phone platforms."
